

Purpose designed workstations built to Department of Education and Training specification for use in administrative areas in today's modern Educational Facilities.

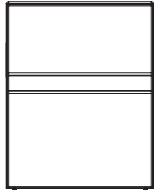

The Watts Edumate workstation is a modular and durable workstation system ideal for clerical and administration areas in educational facilities.

Called the SW and TW range in NSW Department of Education and Training, the Edumate has been specifically designed for schools. As a NSW Government 1006 contracted supplier to DET, Watts are able to supply this product directly to Public Schools.

The innovative Edumate system is available in desk sizes ranging 1500mm to 2400mm and features an adjustable keyboard platform. Screen heights range from 820mm to 2100mm.

The Edumate workstation system can be specified with either ducted or non-ducted screens. In ducted screens, the integrated power duct provides lay-in segregated cabling for simple installation and electrical maintenance where varying quantities of power and data outlets can be terminated. Non-ducted screens provide a simple division between work areas and allow services to be held in under bench cable trays or baskets.

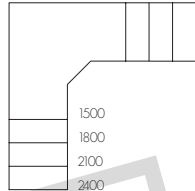

Services can enter the system via several means, including power poles, blades, or screen wall starts. Workstation configurations can be designed to include a wide variety of accessories, including shelving, white boards, and storage units.

System 75 screen, ducted
