

A one piece plastic chair for everyone from young to old that promotes good posture, comfort, and refined style, with unsurpassed strength and durability.

The Titan chair from Watts is your ideal classroom companion. Manufactured from 'high impact' polypropylene, it is made to withstand the toughest of environments, and is backed by a 15 year guarantee to prove it. Stackable to 12 chairs high, the versatile Titan has features that give it uses far beyond just the classroom setting

The first one piece polypropylene chair to meet EN1729 for both posture (part 1) and strength (part 2), the design of the Titan is based on modern anthropometric data, giving the Titan the correct chair dimensions, heights and angles for all age groups. This means the Titan encourages correct posture during developmental years, while also giving greater comfort and support to all its users.

The Titan chair is available in 7 colours (burgundy, charcoal, red, blue, green, yellow and oyster) or with the option of a padded and upholstered back and seat. Seat heights range from 260mm to 460mm to cater for children aged 2 upwards to adults.
